

Kashrut Guide

Jewish Community of Madrid

Siván 5779

June 2019

אוכלים כשר

Supervised by:

Rabbi Moshe Bendahan
Chief Rabbi of the Jewish Community of Madrid

Written and organized by: **Rab Ilay Uziel**

**Responsible for the Kosher Industrial of the
Jewish Community of Madrid**

In order to stimulate and facilitate the consumption of kosher products, the Rabbinat department of the Jewish Community of Madrid publishes a list of foods that can be purchased in the national market, and whose ingredients are allowed.

It must be noted that, in order for a product to carry the kosher seal, they must be controlled from the beginning of the production process to the packaging. Therefore, only products bearing the seal of an authorized rabbi are considered kosher. But because there are products whose ingredients are valid, we publish this list, for those people who are governed by the raw material.

Rabbi Moshe Bendahan

This list includes the products that have been analyzed until June 2019. The brands that are not yet listed may be added once the necessary controls are carried out and approved by the Rabbinat of Madrid.

The list will be updated regularly on the website of the Jewish Community of Madrid:

www.cjmadrid.org

You can send us questions and we will answer you shortly:

direccion@koshermadrid.org

NO Kasher emulsifiers and additives

E120 E163 E304 E334 E335 E336 E337 E353 E354 E422 E430 E431 E432
 E433 E434 E435 E436 E445 E462 E470 E471 E472 (a,b,c,d,e,f,g) E473
 E474 E475 E477 E479 E479b E480 E481 E482 E483 E491 E492 E493
 E494 E495 E542 E570 E572 E573 E904 E912 E914 E915 E920 E966

Kasher symbols found in Madrid:

Important: if we add a stamp next to the name of the product, it means that in order to acquire it, it is required to have the stamp on the product and it cannot buy the same brand without a seal. The new products without seal are supervised, although they go on sale without seal for commercial reasons.

Frozen Vegetables / Cans

Frozen vegetables should be purchased without precooking. The following vegetables are allowed: zucchini, green beans, beans, peppers, mushrooms. Broccoli, cauliflower, brussels sprouts, artichoke hearts, chard, spinach, etc., both frozen and fresh are difficult products to kasherize, therefore, these products must be purchased with certification. The cans of vegetables and fruits that contain the E-300/330, ascorbic and citric acid, are allowed.
